

Corrigendum

Spatio-temporal dynamics and behavioural ecology of a “demersal” fish population as detected using research survey pelagic trawl catches: the Eastern Baltic Sea cod (*Gadus morhua*)

A couple of corrections have been made to wording as per the below (added text has been underlined):

Page 4, at the end of the left column. “In addition, the pelagic CPUE time-series for the central Baltic Sea, as estimated by our model, was compared to the time-series of cod CPUEs from the bottom trawl surveys in the fourth quarter (BITS and historical national surveys) recently.”.

Caption Fig. 6. “Comparison between acoustic survey (this study) and bottom trawl survey BITS in the fourth quarter:”.
