Corrigendum

Corrigendum to: G-computation for policy-relevant effects of interventions on time-to-event outcomes

Alexander Breskin (iD) **, Andrew Edmonds, Stephen R Cole, Daniel Westreich, Jennifer Cocohoba, Mardge H Cohen, Seble G Kassaye, Lisa R Metsch, Anjali Sharma, Michelle S Williams and Adaora A Adimora**

In the section "Estimating the effects of dynamic baseline interventions," conditional exchangeability of treatment, specifically independence between the potential outcomes and observed treatment conditional on baseline covariates, is listed as one of the identification conditions needed for the authors' proposed approach to be valid. This condition was incorrect.

The section has been corrected, and an additional file exploring this condition in more detail has been added to the Supplementary data.
