

Editor's note: Adaptive rank-reduction method for seismic data reconstruction

Juan Wu and Min Bai

This is a retraction-and-replacement to: *Journal of Geophysics and Engineering* (2018), Volume 15, Issue 4, Pages 1688–1705. <https://doi.org/10.1088/1742-2140/aabc74>

The revised manuscript entitled 'Adaptive rank-reduction method for seismic data reconstruction (doi:10.1088/1742-2140/aabc74)' by Juan Wu and Min Bai has been submitted by the authors as a replacement for the originally published version of the manuscript. Following the original publication, the editors became aware of concerns of citation stacking, which is the gratuitous attempt to boost the citation number of articles written by a specific author, who is not a co-author of this article. The authors have subsequently revised their article and submitted a new version without these extra citations. This new version has been reviewed by members of the journal's Editorial Board and is being republished after retraction of the original version of the manuscript.
