Key words: errata, addenda – stars: jets – gamma-rays: stars – radio continuum: stars – X-rays: binaries – X-rays: individual: LS I +61°303.

This is an erratum to the paper ‘Revisiting LS I +61°303 with VLBI astrometry’ (2018, MNRAS, 474, 4245–4253). In the original article, the reference co-ordinates in the caption of fig. 4 and in the second paragraph on page 4247 are incorrect. They should read: ‘RA = 02:40:31.6638, DEC = +61:13:45.592, equinox = ‘J2000’’, and not ‘RA = 02:40:31.6645, DEC = +61:13:45.594, equinox = ‘J2000’’.

In addition, in table 1, the 2006 data the phase center is ‘RA = 02:40:31.6638, DEC = +61:13:45.592, equinox = ‘J2000’’, and in 2015 data the phase center is ‘RA = 02:40:31.6645, DEC = +61:13:45.594, equinox = ‘J2000’’.

These details have been corrected only in this corrigendum to preserve the published version of record.
