

Table S: Average abundance and biomass of zooplankton in the Canada Basin, 2003-2006. * indicates taxon abundance or biomass <0.01 . - indicates species was not present and p -value not reported. NC means biomass not calculated. p -values from ANOVA for interannual (2005 excluded) differences with a significance level of 0.05. p -values are displayed for species that were present in two or more years. The column “year” indicates which years were significantly different if applicable
