Dr. Klurfeld is a nutrition consultant to Dyets, Inc, a manufacturer of diets for laboratory animals.

Dr. Klurfeld is a member of the American Council on Science and Health Board of Scientific and Policy Advisors whose function is to provide advice and review of statements developed by the organization. This is a noncompensated position.

**Simin Liu**
Dr. Liu reports consulting payments and honoraria or promises of the same for scientific presentations or reviews at numerous venues, including but not limited to Barilla, Johns Hopkins University, Fred Hutchinson Cancer Center, Harvard University, University of Buffalo, GuangDong General Hospital and Academy of Medical Sciences, and the National Institutes of Health.

He is also a member of the Data Safety and Monitoring Board for a trial of pulmonary hypertension in diabetes patients at Massachusetts General Hospital.

He receives royalties from UpToDate.

Dr. Liu receives an honorarium from the American Society for Nutrition for his duties as Associate Editor. Dr. Liu is listed as the lead inventor on U.S. Application Serial No. or PCT International Application No. PCT/US2009/064656 filed on November 16, 2009 by UCLA concerning METHODS AND COMPOSITIONS FOR PREDICTING A SUBJECT'S SUSCEPTIBILITY TO AND RISK OF DEVELOPING TYPE 2 DIABETES.

**Mark J Manary**

Dr. Manary is the Director of Project Peanut Butter, a not-for-profit focusing on improving the treatment of malnutrition as well as the production of appropriate, nutrient-dense foods.

His present research activities are funded primarily by Children’s Investment Fund Foundation and USAID Feed the Future program. Dr. Manary has accepted contributions of food ingredients necessary for his research work from the US Dairy Export Council.

Dr. Manary has provided technical advice in areas of his competence on an ad-hoc basis. He does not own personal stock except for investment funds related to his pension that are not under his direct control.

Dr. Manary is a member of the WHO technical expert committee on nutrition, which reviews evidence and writes draft guidelines for treatment and prevention of malnutrition worldwide.

Dr. Manary does not hold or have pending patent applications related or unrelated to his research activities.

Dr. Manary has spoken at meetings and conferences at the invitation of organizations representing the peanut and dairy industries, usually once a year; they have paid his travel expenses, but he has not accepted personal payments or honoraria from these organizations.

Dr. Manary receives an honorarium from the American Society for Nutrition for his duties as Associate Editor.

**Richard Mattes**

Dr. Mattes receives an honorarium from the American Society for Nutrition for his duties as Associate Editor. Dr. Mattes has received grants, travel expenses, honoraria, and consulting fees from numerous food, beverage, and pharmaceutical companies and other commercial and nonprofit entities with interests in obesity, including, but not limited to, ConAgra Foods, the Almond Board of California, California Walnut Commission, Proctor & Gamble and Insys Therapeutics.

**Sue A Shapses**
Dr. Shapses receives an honorarium from the American Society for Nutrition for her duties as Associate Editor.

Dr. Shapses, as an investigator, received research funds or consulting fees from Merck, Inc., Omni Active Tech., and Bayer, Inc.

Dr. Shapses receives honorarium fees and/or travel reimbursement for consulting duties at NASA and NIH.
