Carlo C. Maley, United States of America

Carlo C. Maley is an Associate Professor studying the evolution of cancer at Arizona State University. He graduated from Oberlin College and attained a M.Sc. in Zoology from the University of Oxford as well as a Ph.D. in computer science from the Massachusetts Institute of Technology.

He is currently an Associate Professor at the Biodesign Institute and the School of Life Sciences. He is also the Director of the Center for Evolution and Cancer at the University of California San Francisco, the Associate Director of the Centre for Evolution and Cancer at the Institute for Cancer Research in London, as well as a Research Professor in the Norton Thoracic Institute at St. Joseph’s Hospital and Medical Center in Phoenix, Arizona.

He is a Senior Editor of Evolution, Medicine and Public Health.

Competing Interests

Have you in the past five years accepted the following from an organisation that may in any way gain or lose financially from the publication of papers in Evolution, Medicine and, Public Health?

- Reimbursement for attending a symposium? Yes
- A fee for speaking? No
- A fee for organising education? No
- Funds for research? No
- Funds for a member of staff? No
- Fees for consulting? Yes

Have you in the past five years been employed by any organisation that may in any way gain or lose financially from the publication of papers in Evolution, Medicine and, Public Health? No

Do you directly own stocks or shares in an organization that could profit from publications in Evolution, Medicine and, Public Health (this does not include any such stocks or shares owned as part of mutual funds)? No

Explanation: I have spoken at and have been reimbursed for expenses for the founding congress of the International Society for Evolution, Medicine, and Public Health, which has a profit sharing arrangement with Oxford University Press concerning income generated by the publication of papers in EMPH.

I consult for St. Joseph’s Hospital in Phoenix Arizona, which might conceivably be affected by changes in medical practice caused in part from publications in EMPH. However, I do not know of any specific instance where this is likely to be the case.
